Daiki Shiono

Onely7 | onely7 | https://onely7.dev | daiki.shiono.s1@dc.tohoku.ac.jp

Education

Tohoku University Apr 2024 – Mar 2027 **(expected)**
Ph.D. Program, Graduate School of Information Sciences
System Information Sciences; Suzuki Laboratory (TohokuNLP Group; Advisor: Prof. Jun Suzuki)

Tohoku University Apr 2022 – Mar 2024
M.S. in Information Science, Graduate School of Information Sciences
System Information Sciences; Suzuki Laboratory (TohokuNLP Group; Advisor: Prof. Jun Suzuki)

Tohoku University Apr 2018 – Mar 2022
B.E. in Engineering, School of Engineering
Department of Electrical, Information and Physics Engineering

Research and Industry Experience

Departmental Visiting Student Sep 2026 – Present

University of Cambridge | Department of Computer Science and Technology
Conducting research in Vision & Language and NLP, hosted by Prof. Andreas Vlachos and collaborating closely with Diana Galván Sosa.

Machine Learning R&D Engineer (Intern / Contractor) Apr 2024 – Oct 2026

Turing Inc. | Fundamental AI Group
Contributed to training large-scale vision-language models (LVLMs), building a large-scale Japanese vision-language pretraining dataset, and constructing a Japanese visual instruction-tuning dataset.

Research Assistant Apr 2023 – Mar 2027 (expected)

Center for Data-driven Science and Artificial Intelligence, Tohoku University
Supported research activities through experimental setup, documentation, data maintenance, and related project operations.

Part-time Machine Learning Engineer Mar 2023 – Dec 2023

Future Inc. | Strategic AI Group
Improved OCR models and developed a model for converting foreign personal names into Japanese readings.

Research Support Programs and Scholarships

Research Fellowship Sep 2024 – Mar 2027 (expected)

BOOST Program (Next-Generation AI Talent Development)
Received a research stipend and research funding through the Japan Science and Technology Agency (JST) BOOST initiative.

Research Fellowship Apr 2020 – Mar 2025

WISE Program for AI Electronics (AIE), Tohoku University
Participated in this MEXT-supported graduate education program and received educational and research support funding.

Scholarship Apr 2022 – Mar 2024

Japan Student Services Organization (JASSO) Scholarship
Granted a 50% repayment exemption in recognition of outstanding academic achievements.

Teaching Experience

Teaching Assistant Oct 2023 – Feb 2024

Natural Language Processing
Graduate-level course, Graduate School of Information Sciences, Tohoku University

Teaching Assistant Oct 2022 – Dec 2023

Introduction to Programming for Artificial Intelligence Technology
General education course, Tohoku University

Projects

Local Data Studio Code PyPI

An application for browsing and analyzing local multimodal datasets in your browser.
July 2026

Cosense Zenn Style Code

A collection of unofficial UserCSS, UserScripts and Tampermonkey scripts that make Cosense (formerly Scrapbox) look like Zenn. It also supports importing and exporting Markdown files, switching between light and dark mode, and embedding GitHub files and X posts as cards.
July 2026

Building a Large-Scale Collection of SFT Datasets Translated into Japanese Link to Page

Independent project
Ongoing

Large-Scale Fine-Tuning of a Japanese LLM for Mathematical Reasoning Link to Page

Collaborated on the large-scale fine-tuning of a Japanese LLM specialized for mathematical reasoning tasks, using NeMo on the ABCI 3.0 supercomputer.
Achieved **1st place** in the open division and **2nd place** overall in the FT-LLM2026 Math Task.
March 2026

Sharing Slides Summarizing Insights on LVLMs as of 2024 Link to Slide

Independent project
November 2024

Building a Japanese BERT Model for Long-Sequence Processing Link to Page

Collaborated on the development and distributed pretraining of a Japanese BERT model supporting long-sequence inputs, using Megatron-LM on the TSUBAME4.0 supercomputer.
June 2024

Building SFT Datasets for Japanese LVLMs Link to Page

Outcome from my internship at Turing Inc.
September 2024

Journal Publications

Daiki Shiono, Shingo Yokoi, Shintaro Inuzuka, Tsubasa Takahashi, Jun Suzuki, Yu Yamaguchi. “MOMIJI: 日本語大規模インターリーブ視覚言語データセット.” *Journal of Natural Language Processing*, Volume 33, Issue 4 (General Paper; scheduled for publication December 15, 2026). **Accepted September 18, 2026**.
Acceptance Listing Dataset Code

Awards

1st Place (Open Division), 2nd Place (Overall), FT-LLM2026 Math Task (March 2026).

Committee Special Award, 30th Annual Meeting of the Association for Natural Language Processing **(NLP 2024)** (26/567 submissions, ≈4.59%) (March 2024).

Excellence Award (2nd Place), Open Track, 5th Dialogue System Live Competition (December 2022).

Talks

“Large Vision-Language Models: How They See, Pass, and Answer.”
NLIP Seminar Series, Department of Computer Science and Technology, University of Cambridge. October 2026.
Link to Seminar Page

“Words or Vision: Do Vision-Language Models Have Blind Faith in Text? (CVPR 2025).”
The 17th Saisentan NLP Study Group (SNLP 2025). August 2025.
